EX.NO:4 SPRINT PLANNING

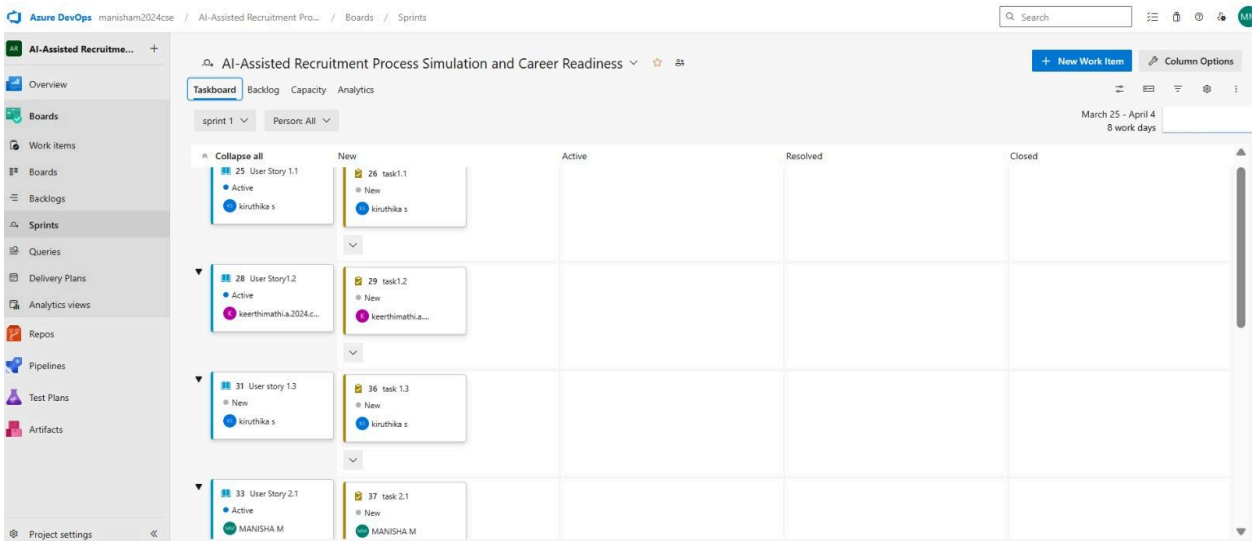
Aim:

To assign user story to specific sprint for the AI-Assisted Recruitment Process Simulation and Career Guidance

Sprint Planning

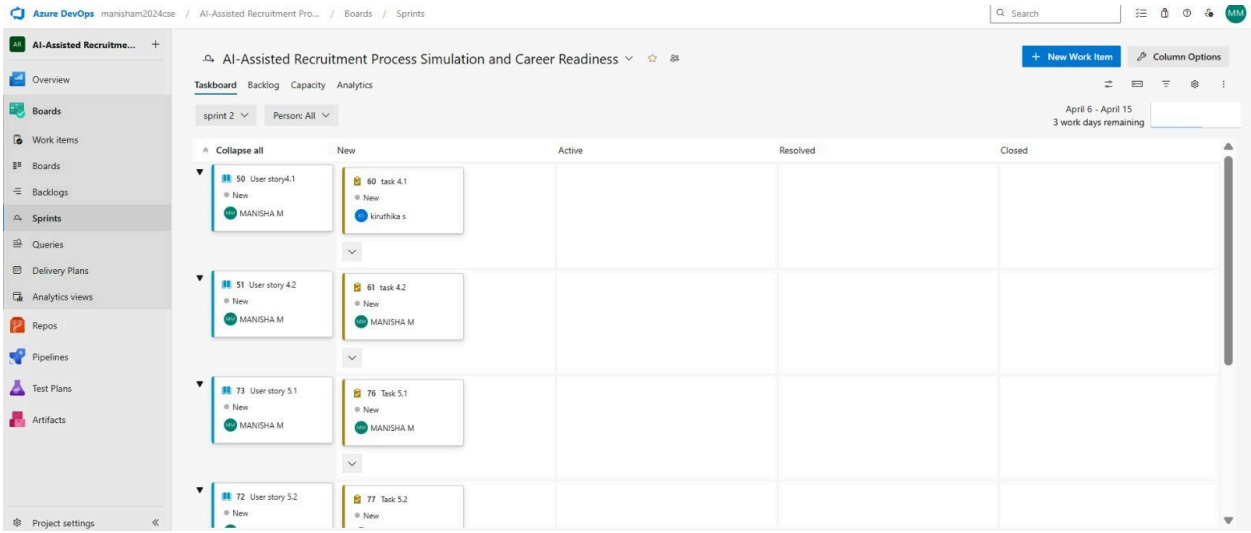
Sprint 1

Select and assign high-priority user stories (e.g., user registration, login, basic profile setup) to the first sprint based on team capacity and goals.



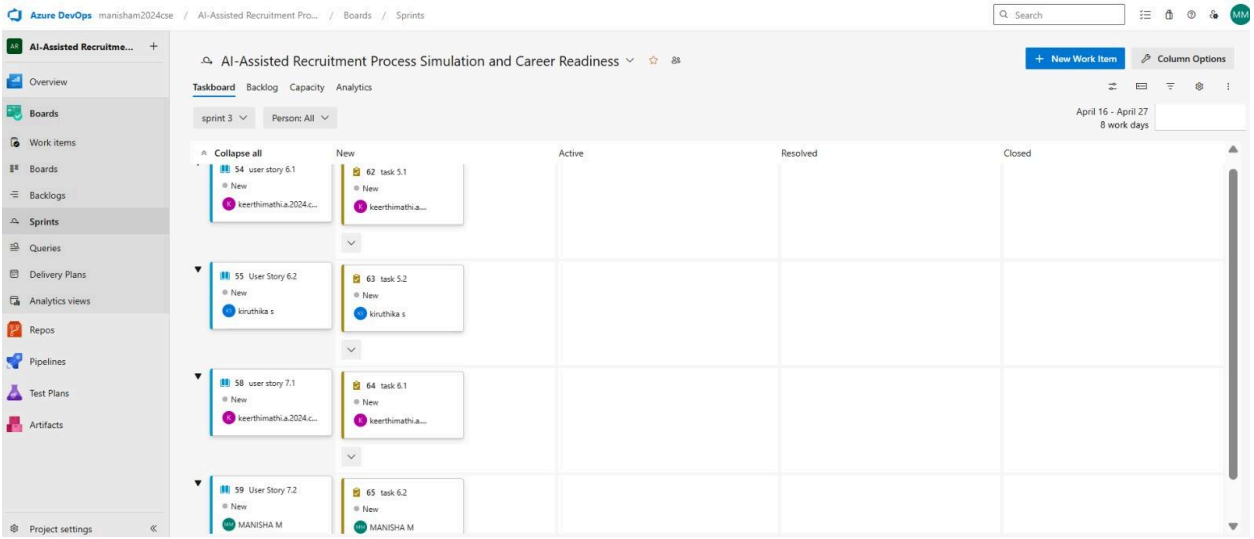
Sprint 2

Assign core functionality user stories (e.g., AI-based mock interview simulation, resume analysis features) based on progress and team capacity



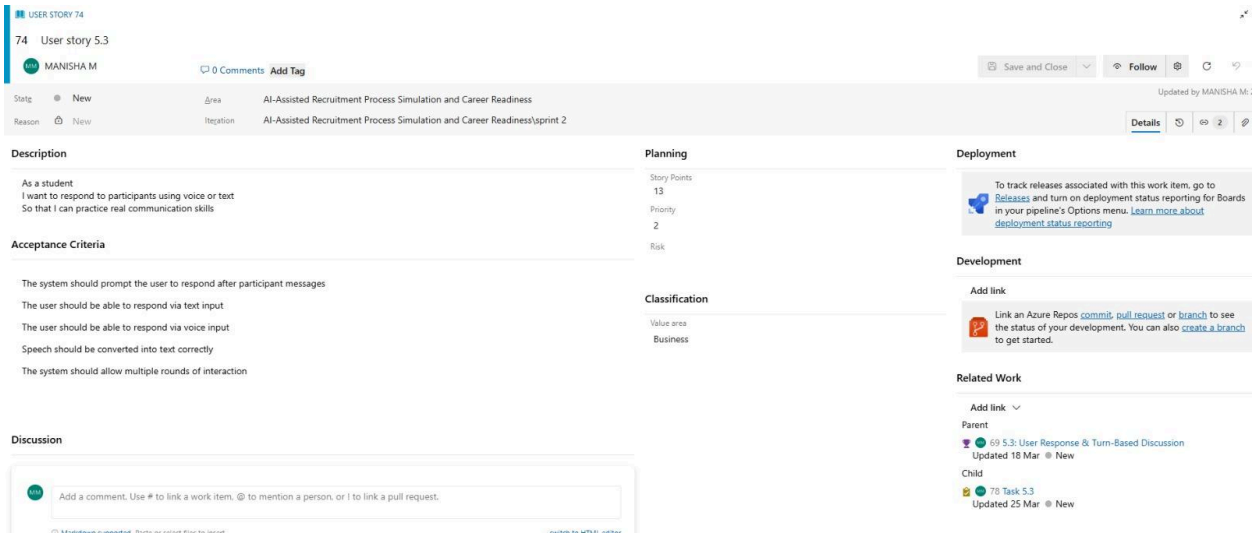
Sprint 3

Assign advanced features (e.g., career guidance recommendations, performance analytics, final testing and deployment) based on remaining work and sprint goals.



Sprint 4

Assign final enhancements (e.g., UI improvements, bug fixes, performance optimization, and project deployment) based on completion needs and feedback.



Result:

The Sprints are created for the AI-Assisted Recruitment Process Simulation and Career Guidance
